

Scotscape LivingPillar™ Plant Selection 2022

Dwarf Mountain Pine (Pinus mugo)

Excellent compact pine with a complex needle structure and high surface area allowing for greater particulate matter collection.

Evergreen Honeysuckle (Lonicera nitida)

Deep green foliage providing broad coverage and a perfect nesting habitat.

Golden Evergreen Honeysuckle (Lonicera 'Baggesen's Gold')

Vibrant buttery yellow foliage of a spreading habit. Evergreen and attractive through the seasons.

Silverbush (Convolvulus cneorum)

Silky grey shrub species with trumpet flowers, a favourite with bees

Variegated Ivy (Hedera helix variegata sp.)

The perfect plant for year round coverage. Excellent shelter for nesting birds

Bearberry Cotoneaster (Cotoneaster dammeri)

Low growing, dense foliage with masses of flowers in the summer and red berries through the autumn.

Creeping Blue Blossom (Ceonothus repens)

Low growing evergreen shrub with beautiful blue spring blossoms, a favourite with bees and butterflies.

Creeping Rosemary (Rosmarinus officinalis 'Repens')

Strongly aromatic herb species with needle like leaves and broad coverage. Premium species of high biodiversity value.

Varnished Hebe (Hebe vernicosa)

A compact, rounded habit evergreen shrub with glossy, dark green leaves producing racemes of small white flowers in early summer. Excellent for pollinators

Mediterranean Spurge (Euphorbia characias)

RHS plant for pollinators. Distinctive spirally arranged narrow blue green foliage. Enjoys full sun and is drought tolerant.

Mexican fleabane (Erigeron karvinskianus)

Profuse flowering from this low habit, creeping species, that benefits bees, butterflies and other important pollinating insects.

Alum Root (Heuchera sp.)

Bright distinctive foliage of a range of colours that brings vibrancy to the mixed plant selection.

Lesser Knotweed (Persicaria affinis 'Superba')

Semi evergreen perennial, low habit with impressive spikes of pale pink flowers. Beneficial to bees and butterflies.

Wall Bell Flower (Campanula portenschlagiana)

Stunning purple flowering through spring and early summer on this hardy evergreen version of the Bell Flower.

Cranesbill (Geranium maculatum)

Excellent semi evergreen herbaceous species offering a long season of pollen and nectar. They thrive in most locations and offer a lush foliage during the summer months.

Elephant Ears (Bergenia cordifolia)

Large evergreen, waxy leaves offer a distinctive foliage with tall pink flowers visible through late spring and early summer.

RHS plants for pollinators.

Feather Grass (Stipa tenuissima)

As the English name suggests this grass offers a softer texture in a mixed plant selection. A year round autumnal feel.

White Gaura (Gaura lindheimeri)

Nectar rich species on tall white flowering stems. Wild, natural appearance. Cut back to crown yearly.
